High in strength.

K-BOARD WPC Board

K-Board WPC Boards are manufactured and quality checked from their factory in Muvattupuzha. Apart from WPC Board, K-Board also manufactures PVC Foam Board, Plywood, Particle Board, and MDF. The best quality materials, high technical expertise, and wide distribution network made K-Board one of the leading wood substitute manufacturers in South India.

Low maintenance, rich and elegant colours and different surface finish makes K-Board WPC Board perfectly suitable for decks and outdoor patios. Due to its durability, it can be widely used in internal and external panels. Because of stain resistance, and high thermal and abrasion resistance, WPC Board is an exemplary choice to make furniture, kitchen cabinets, partitions, bathroom cabinets, etc.

Board.
Durable.
Easy to use.

K-Board PVC Foam Board

K-Board PVC Foam Board is flexible and durable. Since it has strong resistance to harsh outdoor conditions, K-Board PVC Foam Board is an excellent choice for exterior applications. Low water absorption, resistance to chemical abrasion, corrosion and flame resistance, easy transportability, and affordability make PVC Foam Board a perfect alternate for wood and metal.

K-Board PVC Foam Board. Most preferred. Most ideal.

K-Board PVC Foam Board is the most preferred material used in modern architecture. Its high usability, water resistance, and weather resistance make this a good replacement for wood.

Available Thickness:
